One Workspace, Powered by Algo AI

Push Analytics

The Algo platform's push analytics delivers real-time, proactive insights and notifications, empowering businesses to make informed decisions and take immediate action.

API Integration

The highly configurable Algo platform integrates with approximately 100 types of data sources and file formats. Seamlessly unify all internal business information, retailer APIs, and other third-party feeds, enabling real-time access to accurate sales, inventory, and forecast details.

Segmentation & Clustering

Algo helps you segment data sets, group similar records together, and distill information into clear visualizations that can be interpreted with point-and-click simplicity.

Connected Planning

Utilize state-of-the-art technology and data integration to enable synchronized and collaborative planning across teams, optimizing decision-making and driving operational efficiency.

Algo AI

Our AI Assistant uses generative AI to multiply your team's productivity. Minimize the time you spend reviewing, understanding, and explaining your business information.

Shareable Journeys

Create a journey from any data view to streamline group workflows. Journeys build a shared narrative around the discovery of each business opportunity. Identify and share opportunities to construct action plans that fuel cost control and business growth.

User Experience

Algo's platform offers a seamless and intuitive user experience, ensuring effortless navigation and maximizing productivity for users.

AI / ML

Gaze into the future through the lens of innovation. Algo discovers and alerts you about high-value, actionable opportunities by applying proprietary algorithms and heuristics to your complex business information.

Algo Key Differentiators

Functional Expertise

- Trusted by Tier-1 global retail brands
- Comprehensive expertise - from vendors (DCs) down to the retail store level
- Industry domain knowledge informs best practices and outcomes

Speed to Value

- Easy integration with existing ERPs; no 'rip & replace' required
- AI push analytics enhance agility
- Initial forecast and dashboards generated within weeks

AI Architecture

- AI-powered platform that manages big data: up to 1B SKU combos
- System / data-agnostic for guaranteed compatibility
- Cloud architecture enhances business agility and reliability

Algo customers achieve enhanced enterprise-wide outcomes

Slash your cash conversion cycle

- Boost inventory turnover by 8%
- Forecast accuracy improvement of 10%

Power your growth and expansion

- Assortment turn improvement of 7%
- Increase gross margin by 9%

Optimize your inventory management

- Improve in-stock rates by 9%
- Cut overall inventory days of supply 15%
- Forecast accuracy improvement +12%

Streamline your processes

- Ensure trade compliance by 15%+
- Improve accuracy of shrink reporting for scan-based trading by 40%+

Boost revenue and in stocks

- Raise full-price sell-through by 9%
- Increase in stocks by 14%

Transform your planning and replenishment

- Enhance OTIF by 9%
- Develop a supplier quality index to boost fill rates by 10%+
